**Engineering and exploring
endless possibilities.**

www.vmart-ng.co

Top Notch Technology To Maximize Turn-Key Engineering Solutions.

Completion Run In Hole & Sub Assembly make up & Testing services was established by VMART in 2008 to assist clients minimize rig lost time while running completions. Our well equipped engineering facility with the most advanced bucking system to make up high chromium connection of any recommended torque, coupled with advanced joint analyzed make up computers (JAM), has proved to be the most reliable make up system to achieve a leak proof connection.

High pressure testing is made safe to the extreme by pressure testing being carried out inside a 60' feet long testing bunker. Handling of assemblies is made easy with a 5 ton over head crane operated in the division. Supervisors/completion system engineers complete the final computerized documentation with all the specifications of the assembly.

The assemblies are shipped to the field in a properly secured manner. Apart from hydro testing VMART is equipped with one of the most advance Helium Operated Leak Detection System (HOLD). It has a maximum pressure rating of 20K psi and an advanced external sniffing system coupled with software to detect a helium gas leak.

Completion Run in Hole service is another strong area of services provided by VMART.

Our highly experienced completion engineers are capable of running any type of completion such as singles, duals, multi-lateral, whipstock and gas laden well completions. Through the help of VMART's advanced completion-running procedures, we have achieved record running times of all types of completions and have gained the total satisfaction of all our clients.

About Us

www.vmart-ng.co

Our History

Incorporated in 1987 and Proudly Nigerian. VMART was founded on the philosophy of providing High Quality and Excellent Products/services to clients and customers around the world.

With corporate structures in Nigeria, the United States and Asia, we are positioned to deploy our innovative services and products to the global market. VMART has recorded a commendable and incremental success index from inception and our success over the years has been based on a keen commitment to our founding philosophy.

Our Mission

Our Mission is to be a renowned INDIGINOUS organization that will continually build and uphold a good reputation for technical excellence, quality personnel, comprehensive project management and deliver cost effective services that will meet clients needs and the Nigerian NCD requirements.

Our Vision

We aim to be the most competitive and most productive service organization in the world that would meet and exceed customer's expectation. Our core competencies are oil and gas drilling consultancy, Turn-key Tubular engineering, environmental engineering and integrated facility(ies) engineering/Integrity Assurance (IA) are being continuously improved to be the best-in-class.

Our Core Value

We seek to be characterized by our passion, integrity, entrepreneurship and our innovative spirit, as we continually strive to fulfill our vision. These values guide us in all we do and are the bedrock upon which our organization is built.

What We Stand For

Versatility: Adaptability is nested into our daily operations as a company to achieve set goals for our client, as a strategy, we believe in flexibility to meet demands for improved services.

Meticulous: We are thorough in our business that is why we give the very best of engineering services to our client with outstanding industry standard for operations.

Accountability: Because we believe in more, we are accountable to our client in all our operations. We are fixed on a pivot that revolves in accountability.

Resourceful: We bring in the factor for over ground effective and underground effective engineering solutions beyond the edge.

Transparent: We are trusted to deliver quality services across all platforms where we serve; we are anticipated in a position of trust worthy engineering services.

What We Do

www.vmart-ng.co

VMART TUBULAR SERVICES

Our core competences in Oil and gas drilling consultancy, Turn-key Tubular Engineering, Environmental Engineering and integrated facility(ies) engineering/Integrity Assurance (IA) are being continuously improved to be the best- in -class.

EXPERTISE

For 28 years our engineers have worked closely with major energy producers world wide to develop innovative products to optimize the life cycle of equipment required for tubular services. Vmart is recognized as the premier service provider of turn key-services, environmental engineering and non-destructive testing in the oil and gas industry.

RELIABILITY

Vmart Coy,Ltd. is recognized worldwide for our excellent service delivery to clients, capable to manage projects of high demand we have developed and engineered products for oil and gas platforms with demanding quality control processes and procedures, to provide highest quality services

COMMITMENT TO HSE

We are committed to providing a work place where everyone is safe, secure and well, and neither assets nor environment are damaged. This is why we strive to ensure we succeed to reach a value performance with HSES.

INNOVATIVE TECHNOLOGY

We have continuously improved in the application of technology to meet the rising demands of our clients needs globally. Technological advancement in tubular engineering, environmental engineering, data analysis and presentation are key to a standard operation and we thrive in these areas.

CASING & TUBING RUNNING SERVICES

INTEGRATED WELL COMPLETIONS SERVICES

NON DESTRUCTIVE TESTING AND INSPECTION SERVICES

ENVIRONMENTAL ENGINEERING & WASTE MANAGEMNT SERVICES

PIPELINE/FACILITY(IES) ENGINEERING

INTEGRITY ASSURANCE – INTELLIGENT PIGGING & CATHODIC PROTECTION

OIL/GAS FIELD DEVELOPMENT CONSULTANCY SERVICES

INTEGRATED LOGISTICS SERVICES

CUSTOMER RELATIONS MANAGEMENT

We understand the importance of a happy costumer, it brings re-sale and value in service, We hope to serve our costumers to achieve success in service delivery. Our team of costumer service understand the purpose of effective communication in responding to the needs of our clients to boost better relationships with a focus in rendering quality service.

INSPECTION SERVICES

www.vmart-ng.co

Inspection and Processing Services

SN	CODE	DESCRIPTION
1	VM 01	ELECTROMAGNETIC INSPECTION (EMI)
2	VM02	LONGITUDINAL DEFECT INSPECTION
3	VM03	TRANSVERSE DEFECT INSPECTION
4	VM04	INTERNAL AND EXTERNAL CLEANING (RATTLING/COATING OF INTERNALS)
5	VM05	WALL THICKNESS MEASUREMENT
6	VM06	GRADE COMPARISON
7	VM07	END AREA INSPECTION (EAI)
8	VN08	HARDNESS TESTING
9	VM09	VISUAL THREAD INSPECTION (VIT)
10	VM010	DRIFT TESTING
11	VM011	FULL LENGTH MAGNETIC PARTICLE INSPECTION (FLMP)

SAFETY

At vmart we work toward the goal of zero injuries and incidents. We have developed a strong culture of safety and delivering superior safety performance through safety engineering, we have achieved this goal as a result of a dedicated leadership with high value and priority for safety and a strong sense of commitment to lives; We have a committed and skilled workforce. Working safely is a condition before performance of each task.

FACILITY MANAGEMENT

For turn around facility maintenance, overhauling of machines, re-installation, mechanical and electrical modification, revamping of units, testing services and calibration we stand in to give the very best for effective production.

ENVIRONMENTAL ENGINEERING

We are concern with finding plausible solutions in the field of environmental engineering that enhances public health and well being, such as Water Bourne diseases, implementing sustainable environmental projects which promote adequate sanitation in urban, rural, industrial and recreational areas. It involves waste water management, air pollution control, recycling, waste disposal, radiation protection, industrial hygiene, environmental sustainability.

Vmart as a company is keen on research and development on the effect of technological advancement on the environment. We carry out studies on hazardous-waste management to evaluate the significance of such hazards, we are open for consultation on treatment and control and develop sustainable solution. We have capable environmental engineers who design municipal water supply and industrial wastewater treatment systems. We are ISO, OSHA and EMS certified.

ENVIRONMENTAL ENGINEERING/ WASTE MANAGEMENT SERVICES

- INDUSTRIAL WASTE MANAGEMENT
- SEWAGE AND INDUSTRIAL WASTE TREATMENT/MANAGEMENT
- TREATMENT/MANAGEMENT OF OILY SLUDGES, SLOP OIL AND WASTE LUBE OILS
- OIL SPILL CLEAN UP AND REMEDIATION
- ENVIRONMENTAL STUDIES- EIA, EIS, EER, BASELINE STUDIES

MACHINE SHOP SERVICES

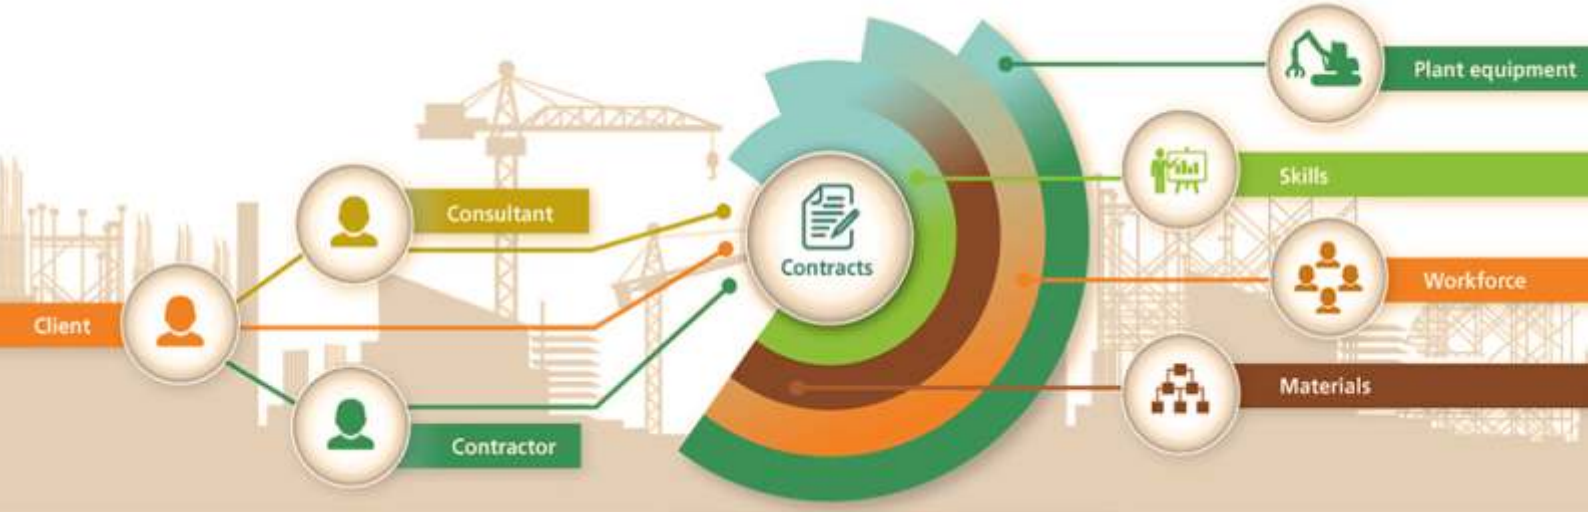

www.vmart-ng.co

- OCTG Re-threading (casings & Tubings & Special Threads)
- OCTG Accessories/parts (subs, X-overs, couplings, api etc)
- Construction Of Floating Jackets
- Maintenance Of Valves , Drill Mandrells, Wash Pipes
- Modification Dcb Hangers
- Fabrication Of Control Test Line
- Provision Of Fishing Tools & Rentals
- Rental/servicing Of Drilling Jars
- Repair/rewinding Of Electric Motors
- Conductor Pipe Fabrication
- Coiled Tubing Real Repair/ Overhaul/manufacturing
- Make Up & Break Out Plain End Threading
- Hardbanding Services
- Stabilizer Hard Banding
- Heat Treatment Of Metals
- OCTG Special Inspection/NDT
- Heavy Duty Generator And Compressor Overhauls
- Surfacing/regrooving Of Ring Grooves And Adaptors To Flanges
- Steel Fabrication/Construction
(completion Equipments/oil Field Baskets, Casing Landing Clamps)
- Repair/overhaul Of Gas/air Compressors

ENGINEERING OPERATIONS

Over the years we have been in the fore front of engineering services in delivering quality service to our clients. We have the capability to handle contracts in engineering, procurement and construction, we have the required work force to execute any project in a timely frame. We have a good client base as our reference, which includes companies such as NNPC, NPDC, Shell, Chevron, Seplat etc. We understand the broadness and impact of engineering for life, so much so that, we constantly thrive with working ideas that engender notable solutions. We think tubular engineering, we think environmental engineering as a way to empower and touch lives globally, Vmart believes in the development of local content. That is why we believe in skills acquired via training, we train our team to constantly build a bigger, better and stronger work force.

FABRICATION AND CONSTRUCTION

www.vmart-ng.co

Fabrication and construction is a core service for **Vmart** and as much as there is a rising need for maintenance and rehabilitation to boost exploration and production, we drive with this perspective to enhance engineering projects by giving quality engineering services with detailed engineering design, quality control, timely delivery, from commissioning to decommissioning, drilling to completion. We thrive and endeavor to give excellent services in this areas of deep water(offshore) and onshore activities. We carry out maintenance services on flow lines, risers, hangers etc.

A step in the right
direction...

COMPLETION SUB ASSEMBLY MAKE UP & TESTING SERVICES

Completion Run In Hole & Sub Assembly make up & Testing services was established by **VMART** in 2008 to assist clients minimize rig lost time while running completions.

Our well equipped engineering facility with the most advanced bucking system to make up high chromium connection of any recommended torque, coupled with advanced joint analyzed make up computers (JAM), has proved to be the most reliable make up system to achieve a leak proof connection.

High pressure testing is made safe to the extreme by pressure testing being carried out inside a 60' feet long testing bunker. Handling of assemblies is made easy with a 5 ton over head crane operated in the division. Supervisors/completion system engineers complete the final computerized documentation with all the specifications of the assembly. The assemblies are shipped to the field in a properly secured manner.

Apart from hydro testing **VMART** is equipped with one of the most advance Operated Leak Detection System (OLD). It has a maximum pressure rating of 20K psi and an advanced external sniffing system coupled with software to detect a gas leak. Completion Run in Hole service is another strong area of services provided by **VMART**.

Our highly experienced completion engineers are capable of running any type of completion such as singles, duals, multi lateral, whip stock and gas laden well completions. Through the help of **VMART's** advanced completion-running procedures, we have achieved record running times of all types of completions and have gained the total satisfaction of all our clients.

PROCUREMENT

Vmart delivers special power tong ranging from hydraulic power tong and power unit that are known for high performance, We offer specialized power tong systems such as the Chrome-Tek™ jaw system - a CRA running system.

PROCUREMENT

VMART
www.vmart-ng.co

www.vmart-ng.co

CASING AND COMPLETION RUNNING SERVICES

Vmart delivers special power tong ranging from hydraulic power tong and power packs to Oil Country Tubular Goods (OCTG) analysis systems and bucking units, We offers a full range of tubular equipment and professional personnel to meet the highest levels of performance. All our power tongs are fitted with door safety inter-locks and tubing tongs with integral back-up systems to help ensure optimum connections. We offer specialized power tong systems such as the Chrome-Tek™ jaw system - a CRA running system that offers handling and make-up without leaving die marks. In addition, our drill pipe tongs can produce up to 100,000lbs/ft of torque to ensure that drill strings run smooth and fast. Our equipment can handle sizes from 36" to 2-3/8".

Our purpose-built bucking units can handle all tubular sizes, types and torques from an expensive completion component in an exotic CRA material to regular buttruss carbon steel. For example, our Type III bucking unit is capable of offset make-up which is particularly useful for dual completions and certain types of gas lift mandrels. Furthermore, all of our bucking units can be dressed with our Chrome-Tek system to help reduce marking of your tubular and completion components.

We understand that regular and ongoing analysis is the key to ensuring joint integrity for all of our tubular products, we offer OCTG analysis systems designed to control, analyze and record the make-up of premium and API tubular connections. By displaying precise, real-time make-up information, with color graphics set to operator specifications, our analysis systems can help prevent or quickly correct under- or over-torquing.
